About Us

We are dedicated to enriching the lives of individuals with developmental disabilities throughout Ohio by providing the best quality direct-support professionals and technology solutions.

We encourage and support both individuals and staff to develop meaningful relationships to live happy, healthy lives, and to develop independence, purposeful and meaningful experiences along with fully integrating people into their community as they choose.

Remote Support

We are proud to be one of Ohio's premier remote support suppliers. We provide HPC services, create unique remote support solutions, install the solutions we develop, and monitor them, all in our state-of-the-art support center.

Each system is uniquely designed for the home it is placed in. This means we personally visit the home, communicate directly with the individual, and get input from the team regarding what is needed to build the most valuable solutions. Once the system is installed our individuals are required to do very little to maintain the operation of the system on site.

The systems may include, but are not limited to; emergency pendants, perimeter security, audio and/or video monitoring, environmental controls, fire monitoring, medication monitoring, and reminder calls. Each of these systems have two-way voice communication, battery backup and even tamper sensors.
