About Us

We are dedicated to enriching the lives of individuals with developmental disabilities throughout Ohio by providing the best quality direct-support professionals and technology solutions.

We encourage and support both individuals and staff to develop meaningful relationships to live happy, healthy lives, and to develop independence, purposeful and meaningful experiences along with fully integrating people into their community as they choose.

Assistive Technology

Our Adaptive and Assistive Technology solutions are part of a comprehensive service designed to enable our clients to better perform daily activities and to better communicate within their environment. It starts with an assessment to determine what is needed and will result in a solution specific to the person.

These solutions can include any assistive technology such as devices, controls, or appliances to enable them to increase their ability to person activities of daily living, or to control/communicate with the environment they live in.

It will include items necessary for life support, ancillary supplies, and equipment necessary for proper functioning.

All of these items meet applicable standards of manufacture, design and installation for the person they're intended for.

It is important to make sure those that you care about are able to thrive in the environments they live in, and we take pride in making sure that we find the best solution for your loved one. A solution that allows them to have a greater quality of life with ease and one that allows them to be their best self.
